

Why do we care?

What are we looking for?

Pediatric Pain data

Correlation Matrix

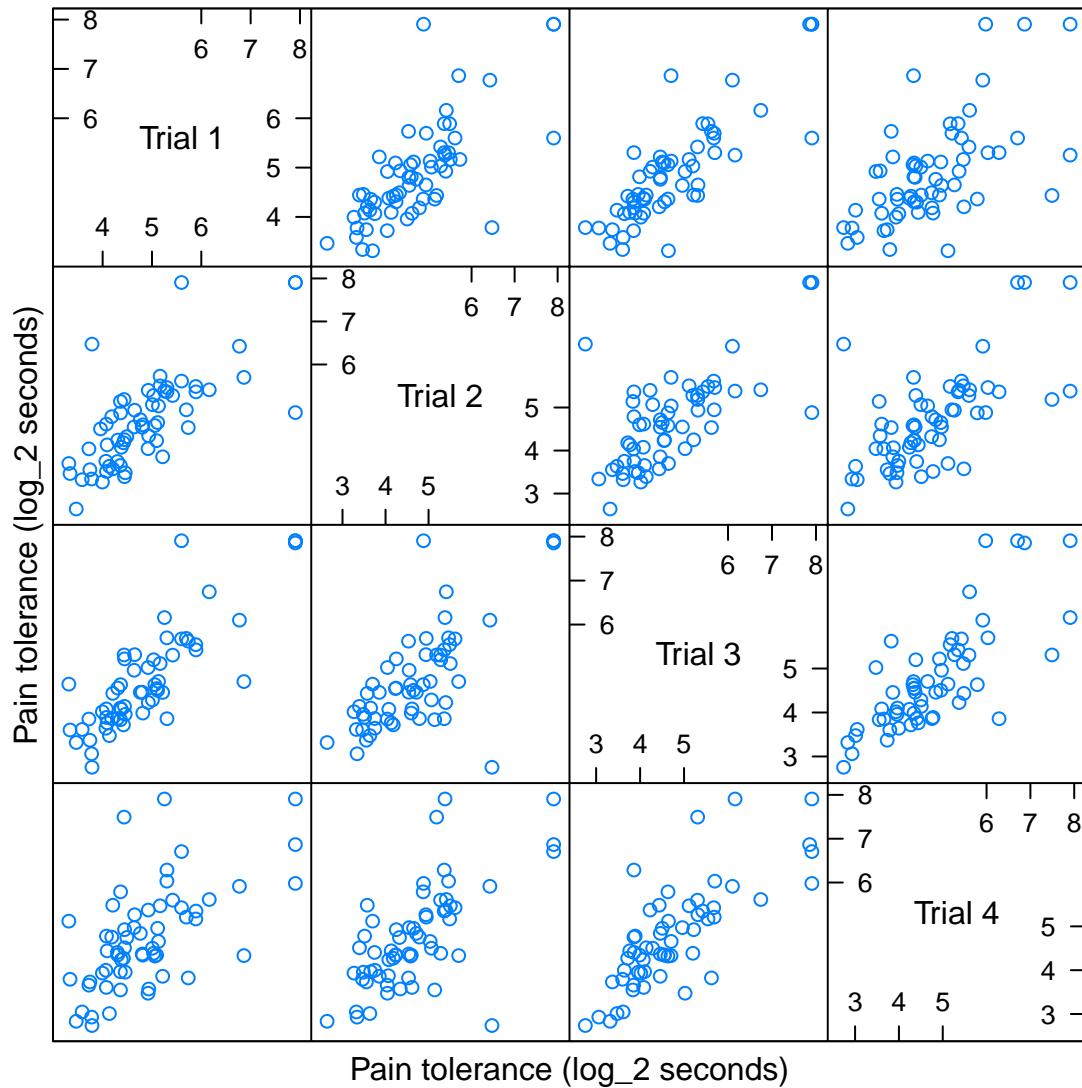

```
> pp <- read.delim("http://rem.ph.ucla.edu/rob/mld/data/tabdelimiteddata/pain.txt")
> pp2 <- cast(id ~ trial, value = "l2paintol", data = pp)
> ppcor <- cor(pp2[, 2:5], use = "pairwise.complete.obs")
> rownames(ppcor) <- colnames(ppcor) <- names(pp2)[2:5]
> round(ppcor, 2)
```

	1	2	3	4
1	1.00	0.73	0.84	0.60
2	0.73	1.00	0.72	0.66
3	0.84	0.72	1.00	0.76
4	0.60	0.66	0.76	1.00

Scatterplot Matrix

```
> lab <- "Pain tolerance (log_2 seconds)"
> names(pp2)[2:5] <- paste("Trial", names(pp2)[2:5])

> plot(splom(~pp2[2:5], data = pp, as.matrix = TRUE, xlab = lab,
+ ylab = lab))
```

Small mice data

```
> sm <- read.delim("http://rem.ph.ucla.edu/rob/mld/data/tabdelimiteddata/smallmice.txt")
```

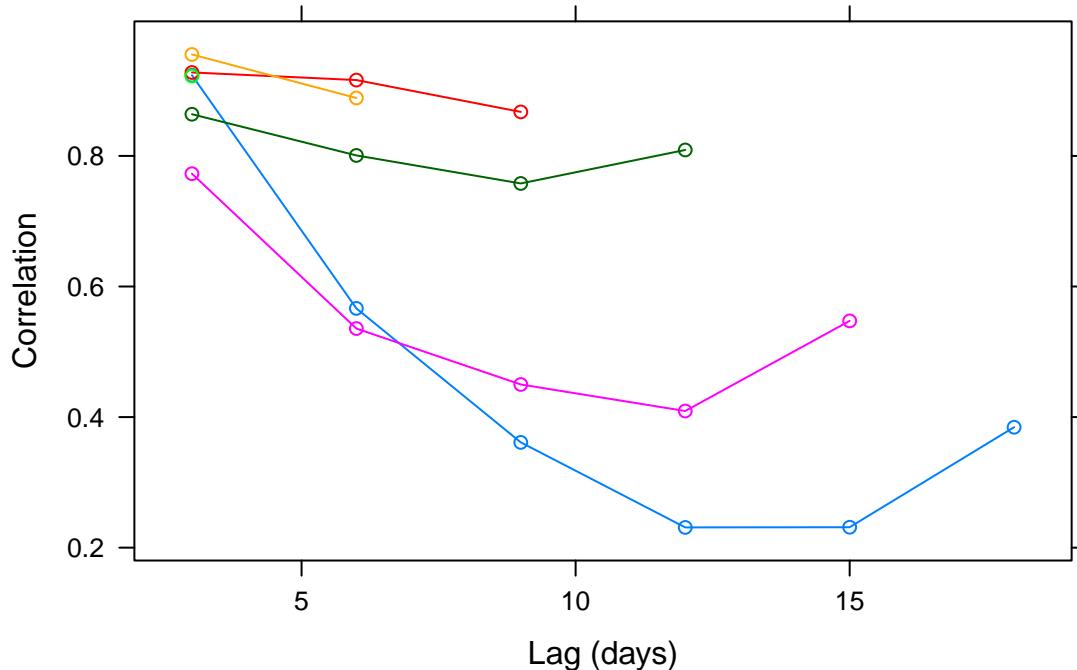

Correlation matrix

```
> sm2 <- cast(id ~ day, value = "weight", data = sm)
> smcor <- cor(sm2[, 2:8])
> rownames(smc) <- colnames(smc) <- names(sm2)[2:8]
> round(smc, 2)
```

	2	5	8	11	14	17	20
2	1.00	0.92	0.57	0.36	0.23	0.23	0.38
5	0.92	1.00	0.77	0.54	0.45	0.41	0.55
8	0.57	0.77	1.00	0.86	0.80	0.76	0.81
11	0.36	0.54	0.86	1.00	0.93	0.92	0.87
14	0.23	0.45	0.80	0.93	1.00	0.96	0.89
17	0.23	0.41	0.76	0.92	0.96	1.00	0.92
20	0.38	0.55	0.81	0.87	0.89	0.92	1.00

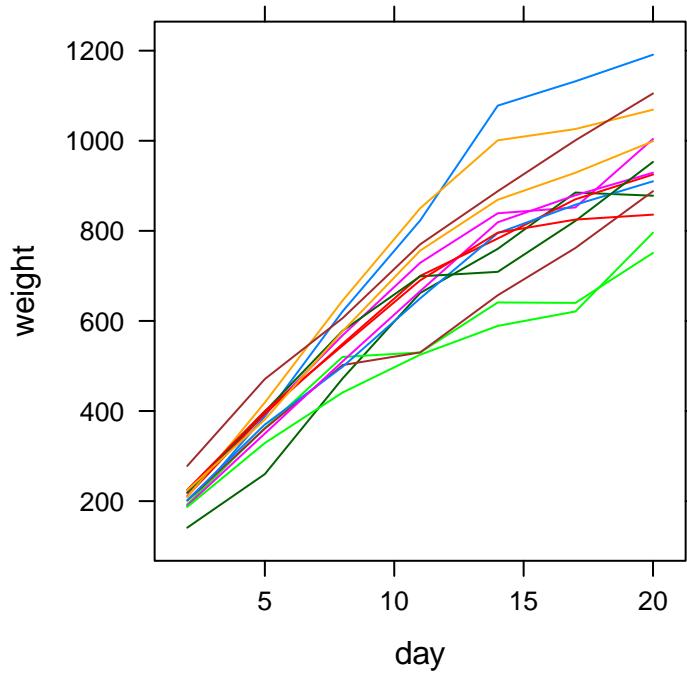

Correlogram

```
> smcorm <- melt(smc, measure.var = 1:7)
> smcorm$lag <- smcorm$X2 - smcorm$X1
> smcorm <- subset(smcorm, lag > 0)
> plot(xyplot(value ~ lag, group = X1, data = smcorm, type = c("p",
+ "l"), xlab = "Lag (days)", ylab = "Correlation"))
```

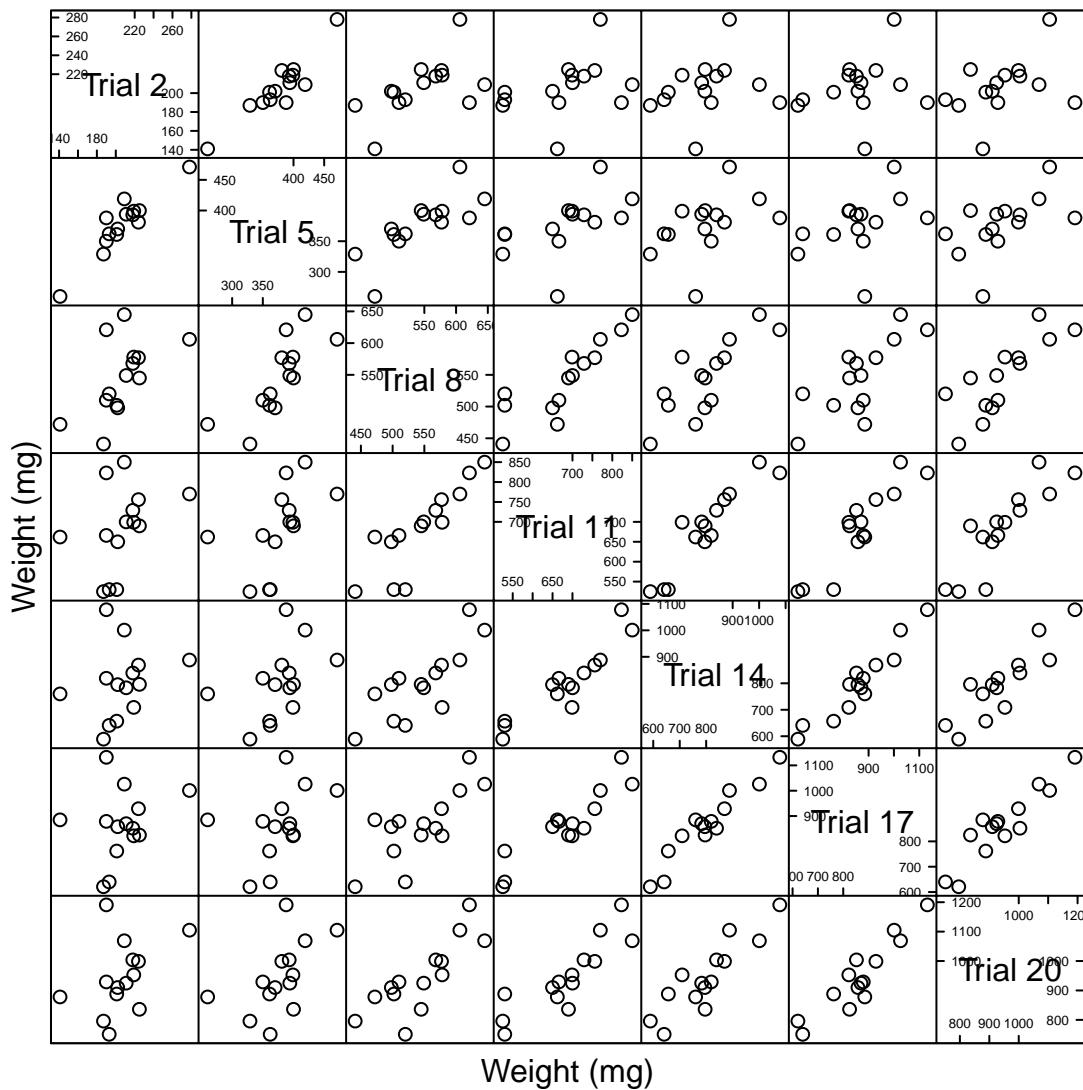

profile plot:

```
> plot(xyplot(weight ~ day, group = id, data = sm, type = "l"))
```

Scatterplot Matrix

```
> lab <- "Weight (mg)"  
> names(sm2)[2:8] <- paste("Trial", names(sm2)[2:8])  
  
> plot(splom(~sm2[2:8], data = sm2, as.matrix = TRUE, xlab = lab,  
+ ylab = lab, par.settings = mtheme))
```

Ozone data

Correlation Matrix:

```
> oz <- read.delim("http://rem.ph.ucla.edu/rob/mld/data/tabdelimiteddata/newozone1.txt")
> oz2 <- cast(site + day ~ hour, value = "ozone", data = oz)
> ozcor <- cor(oz2[, 3:14], use = "pairwise.complete.obs")
> rownames(ozcor) <- colnames(ozcor) <- names(oz2)[3:14]
> round(ozcor, 2)
```
